I understand – just wanted to be sure to coordinate any field sampling to avoid additional cost if we were already collecting samples for a particular media.

Thank you for thinking of me. However, I am not able to participate in the RI/FS scoping. Site Assessment program will get involved in the site after community support is obtained for proposing the site to the NPL.

Victor – I meant to include you on this. I don't know if you are interested in attending this meeting to scope a "global" RI/FS for the UA watershed. I would expect that as we define the broader picture we will be figure out a way to divide the site into more manageable OUs. My intent would be as we begin to define more specifically our sampling programs, we would provide SA with the opportunity to identify their sampling needs and how they would fit into the RI work plan(s). Let me know how you would like to have SA included in our planning process.

Of course, you have had a lot of experience in developing the RI/FS at large SF sites so it would be nice to have your input in that realm also. Thanks.

Subject: Scoping of "global" RI/FS for Upper Animas

All – I would like your help and participation in attending a scoping meeting for an RI/FS for the Upper Animas watershed. As many of you know, EPA, BLM and the State wish to move ahead with more completely defining the water quality problems in the Animas river watershed and it would help if we could identify the “universe” of areas to focus on – even if evaluating all aspects can’t happen at once.

Please respond this week (Dec. 16-19) with your availability to attend either:

- ☐ ☐ ☐ ☐ ☐ ☐ the Monday, Tuesday or Wednesday the week of January 26th **or**
- ☐ ☐ ☐ ☐ ☐ ☐ the Tuesday, Wednesday or Thursday the week of January 19th.

I would suggest planning on meeting all morning and perhaps part of the afternoon of the day we meet. The amount of time we need may not need to be as long but I wanted to allow plenty of time for the necessary technical discussion.

I would like to get this meeting scheduled and on everyone’s calendar before the holidays. If you have any questions, please feel free to give me a call at 303-312-6861.

Thank you.
